

The AWC knows how difficult it can be for families and caregivers of individuals with IDD to balance the finances, special needs, and time it takes to take a vacation, that is why we are excited to offer our annual Families in Action Retreat! Families in Action is a chance for 10 families from the counties we serve to take a weekend up in the mountains and have a vacation-like experience free of charge! Parents attend advocacy training with professionals in several different fields, while all of their children are partnered with volunteers for a true camp experience.
